*For Alex McKenna, high school is just a distraction from the love of his life, Margaret, with whom he can't wait to spend more time once they get to college.*

In many respects, Alex is just an average seventeen-year-old boy . . . except for the fact he's a transgender medium born from a long line of Strega witches, possessing the ability to communicate with ghosts.

With the help of Margaret and his talented Strega great-grandmother, Alex will learn how to strengthen his abilities. The dead need Alex to help them reconcile issues they left behind — and he finds that he needs them, too. As his abilities multiply, assisting the dead becomes an outlet to channel his new energy, giving him the strength to come to terms with who he is as a transgender male, and how far he will choose to go.
